TOPOLOGY AND ITS APPLICATIONS

a journal devoted to general, geometric, set-theoretic and algebraic topology

Founded by J. de Groot

Volume 82, Numbers 1–3, 23 January 1998

Special Volume
in Memory of Kiiti Morita
Guest Editors: Jun-iti Nagata, Akihiro Okuyama, Takao Hoshina

ELSEVIER, Amsterdam – Lausanne – New York – Oxford – Shannon – Tokyo

ELSEVIER

Topology and its Applications 82 (1998) vii–ix

TOPOLOGY AND ITS APPLICATIONS

Topology and its Applications
Volume 82, Numbers 1–3, 23 January 1998

Special Volume
in Memory of Kiiti Morita

CONTENTS

Editorial 1

T. Hoshina, J. Nagata, A. Okuyama and T. Watanabe
Kiiti Morita 1915–1995 3

N. Aoki, K. Moriyasu and M. Oka
Differentiable maps having hyperbolic sets 15

A.V. Arhangel'skii and T. Nogura
Relative sequentiality 49

H.L. Bentley and H. Herrlich
Morita-extensions and nearness-completions 59

C.R. Borges
$D^*(\mathbb{R};\leqslant)$ does not imply D_1^* 67

J. Chaber, G. Gruenhage and R. Pol
On Souslin sets and embeddings in integer-valued function spaces on ω_1 71

Y.M. Chung, K. Tomioka and N. Aoki
Topological properties of differentiable maps derived from 2-toral endomorphisms 105

P.J. Collins and K. Morita
Coverings versus entourages 125

V.V. Fedorchuk and Y.V. Sadovnichy
On some categorical properties of uniform spaces of probability measures 131

Z.M. Gao
$\aleph$-spaces and g-metrizable spaces and CF family 153

T. Goto
Metric dimension of the intersections of a point set with hyperplanes 161

G. Gruenhage, J. Kulesza and A. Le Donne
Connectifications of metrizable spaces 171

Y. Hattori and K. Yamada
Finite-to-one mappings and large transfinite dimension 181

T. Hoshina and K. Yamazaki
Extensions of functions on product spaces 195

H.H. Hung
Metrization and stratification of squares of topological spaces 205

T. Ishii
New types of separation properties and countably w-paracompact spaces 211

H.J.K. Junnila and Y. Yajima
Characterizations of submetacompactness 227

L.R. Junqueira and F.D. Tall
The topology of elementary submodels 239

H. Kato
Expansive homeomorphisms on surfaces with holes 267

H.-P. Künzi and E. Wajch
An internal characterization of sets of functions determining minimal compactifications 279

B.I. Kurpita and K. Murasugi
A graphical approach to the Melvin–Morton Conjecture, Part I 297

C. Liu and Y. Tanaka
Star-countable k-networks, and quotient images of locally separable metric spaces 317

S. Mardešić and A.V. Prasolov
On strong homology of compact spaces 327

T. Mizokami
The embedding of a mapping space with compact open topology 355

K. Morita
Results related to the Michael line 359

H. Ohta
Dieudonné completeness of a space of closed subsets and extensions of an open-closed map 363

A. Okuyama and S. Watson
Note on hereditary normality of product spaces 369

B.A. Pasynkov
On the finite-dimensionality of topological products 377

G. Preuß
The topological universe of locally precompact semiuniform convergence spaces 387

M.E. Rudin
Compact, separable, linearly ordered spaces 397

A.H. Stone
σ-fields of bad Borel sets 421

Y. Tanaka
k-networks, and spaces having the weak topology with respect to closed covers of metric subspaces 427

Y. Tanaka and T. Murota
Generalizations of $w\Delta$-spaces, and developable spaces 439

Author Index 453
